REMARKS

25X1A

At 11:30 a.m. and 1 p.m. respectively on 2 June 1953, two troop trains arrived at the Altengrabow railroad station, coming from the direction of Loburg. The first train included 12 AA guns of 25-mm or 37-mm and 24 trucks and the second train consisted of an undetermined number of flatcars carrying 18 AA guns of 25-mm or 37-mm and 27 trucks and 5 boxcars with personnel wearing red-bordered black epaulets. The AA guns were canvas-covered with bracings and, source thought, had no gun shields. The motor vehicle numbers were covered.

Comment. The report confirms that light AAA units continued conducting firing practices in Altengrabow. The number of AA guns observed with the second train tends to indicate that the unit is an AAA battalion of old-type organization of a motorized rifle division.
